HOBERG ITEMS

The farmers are all busy putting in their spring crops. The weather is ideal, the showers at night being a great benefit to all growing crops.

Miss Ada Veith who underwent an operation has almost entirely recovered. Her many friends are very glad to have her out with them again.

Mr. and Mrs. W. L. Howard and Mr. and Mrs. W. M. Pate and family all spent the day Sunday at the beautiful country home of Mr. and Mrs. Albert Baugh.

Hoberg school closed Friday. Miss Ethel Boston of Mt. Vernon taught the school. Almost the entire community gathered at the noon hour and a bountiful dinner was spread. In the afternoon many recitations and dialogues were delivered. Everyone present wore a pleasant smile, and especially the teacher, for the directors had met the evening before and elected her for another term.

Mrs. Haywood Lea, who was operated on at Dr. Shelton's hospital, was able to return home and is improving nicely.

Oscar Schilomann and Miss Emma Pohlman were married Wednesday.

Mrs. W. L. Howard was called to Kansas City last Monday on account of the death of her sister, Mrs. R. J. Porter. She returned home Friday evening. Her mother, Mrs. M. E. Beymer, accompanied her as far as Joplin and will visit her sons, Grover and Melvin Beymer.

Born to Mr. and Mrs. Louie Majors, a fine baby boy.

Fred Stauffer sold his Ford car to John Means. He will get a new 1915 Model.

C. F. Garington of Springfield, Mr. and Mrs. W. M. Pate and family and Mr. and Mrs. W. L. Howard motored to Joplin Sunday, returning Monday morning.

Mr. Schilomann, who is now a resident of Hoberg and has moved into the property he purchased from Mrs. Foderhaus, has purchased a new Ford car.

Mrs. Burton and son Kenton are visiting friends in St. Louis. They will be absent about ten days.

Mrs. Scott, mother of Mrs. C. F. Carter, is quite ill this week.

Infetion in the Air

Medical authorities agree that colds are infectious. In some cities children with colds are barred from schools. Spring's changing weather brings many colds. The quickest and safe way to stop colds, coughs and croup is to give Foley's Honey and Tar Compound. For sale by A. H. Cox & Co.

You have seen many home talent entertainments in Monett but you have never seen anything like that which will be given by the Monett Elks the evening of May 17th. We refer to the Original Humbug Circus. By all odds this is the greatest of shows and the only one of its kind on the road. Considering the nature of the street parade, it is really one of the most wonderful stunts conceivable. Notwithstanding the embargo on dyes from Germany, the parade is one continuous streak of colors from the many hued costume of the trumpeter who leads the cavalcade to Geo. Rice, who plays the ear splitting caliope a half mile to the rear. 62 tl.

FELT BAD ALL THE TIME

Shellhorn Lady Suffered a Great Deal, But Is All Right Now.

Shellhorn, Ala.—In a letter from this place, Mrs. Carrie May says: "A short time ago, I commenced to have weak spells and headaches. I felt bad all the time, and soon grew so bad I couldn't stay up. I thought I would die. At last my husband got me a bottle of **Cardul**, and it helped me; so he got some more. After I had taken the second bottle, I was entirely well. I wish every lady, suffering from womanly trouble, would try Cardul. It is the best medicine I know of. It did me more good than anything I ever used."

Cardul is a woman's tonic—a strengthening medicine for women, made from ingredients that act specifically on the womanly organs, and thus help to build up the womanly constitution to glowing good health.

As a remedy for woman's ills, it has a successful record of over 50 years. Your druggist sells it. Please try it.

N. B.—Write for Ladies' Advisory Dept., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper, on request.

WHY I GO TO SCHOOL

(Concluded from first page)

Life. Culture makes ones life lovelier, fuller, deeper.

The last phase I wish to note in discussing the many elements of education, is the industrial phase. One of the most widely discussed questions among educators today is how to make education most practical, and already this problem has partly been solved. Manual training and domestic science are no longer strangers in the school room. Many high schools are putting in certain vocational courses. A great number of tomorrow's stenographers, bookkeepers and telegraphers are today getting their commercial training in the wholesome atmosphere of the school rooms, supplemented by their other studies. Today, agriculture holds a prominent place in the school curriculum; and although it is not primarily a trade subject, yet the teaching of it will ultimately make better farmers.

Thus, we see much vocational training is offered in the school even today, and thousands of girls and boys are yearly coming to school for this industrial education.

From the foregoing, I have tried to show some of the values of an education which have drawn me to the school, but had I no ambition for success nor desire for an education there are still two forces, at least, that would hold me in school.

One of these forces is a duty I owe to the state and society at large. When the American colonists gained their freedom, they placed the supreme political power in the hands of the common people. These far-sighted men fully realized that self-government would be a failure without universal education, so they began the greatest educational experiment the world has ever known—that of educating the common people. The State of Missouri today sets aside nearly one-third of its great revenue for the education of its youth, with the primary and in view of training intelligent voters and all round good citizens. Inasmuch as the destinies of the Nation depend upon the education of its citizens, we recognize the right of the state of keeping the child in school by compulsory laws until he is fourteen years of age. After that, she has provided high schools, normals, and a university for those who can and are willing to push forward. I think it is not only a privilege but a duty I owe to the state, to take every possible advantage of these educational opportunities.

The other force that holds me in school is the sacred duty I owe my father and mother. They who have loved and toiled for me all my life, are immediately and vitally interested in my education. They have nobly striven to give me every possible opportunity, and I would be very ungrateful, indeed, if I were not to take advantage of these opportunities, and try to repay them in some way for all their loving and unselfish labor.

Why do I go to school? Because the only road that will lead me to the fulfillment of my parent's fond hopes is through the school. There is the best place to form my character; there is the best place to learn to serve my fellowman.

Briefly in conclusion, I shall say that I go to school to train my body for health and strength, my hands to do, my mind to think and my heart to respond to right motives, in order that I may become a good citizen and an intelligent useful member of society.

HUMPHREYS'

These remedies are scientifically and carefully prepared prescriptions; used for many years by Dr. Humphreys in his private practice, and for nearly sixty years by the people with satisfaction.

CITROLAX

Best thing for constipation, sour stomach, lazy liver and sluggish bowels. Stops a headache almost at once. Gives a most thorough and satisfactory flushing—no pain, no nausea. Keeps your system cleansed, sweet and wholesome. Ask for Citrolax. For sale by A. H. Cox & Co.

PLEASURE PARK FOR MONETT

W. E. Bower has been working for some time getting a tract of land in the north part of town in condition for an amusement park. He has finished excavating for a swimming pool and concrete is on the ground for its completion. The pool will be 30 by 60 feet in size and will be six feet deep in the deepest place. He will use city water in the pool. Bath houses and all conveniences will be there for the use of the public.

The location for this park is beautiful. It is on high ground in the north part of town and on it is a natural woodland. There will be plenty of shade and grassy places for those who wish to go to a quiet place to rest. It is in easy walking distance from any part of the city.

Mr. and Mrs. W. M. Wainright returned home, Tuesday, from a visit to Mr. and Mrs. Edley Martin at Texarkana. Their grandson, Wain Martin, came home with them for a visit. Mr. Wainright stood the trip well and is feeling fine.

Danger to Children

Serious illnesses often result from lingering coughs and colds. The hacking and coughing and disturbed sleep rack a child's body and the poisons weaken the system, so that disease cannot be thrown off. Foley's Honey and Tar Compound has eased coughs, colds and croup for three generations; safe to use and quick to act. There is no better medicine for croup, coughs and colds. For sale by A. H. Cox & Co.

GREEN HILL ITEMS

We are having cool rainy weather at present.

T. F. Jackson is preparing to move to his prairie farm in the near future.

Clyde Davis is erecting a new house on his farm, better known as the old Shields Ranch.

Hershel Marbut is working for Clyde Davis this summer.

The strawberry crop is looking fine at present.

Edwin Davis had a horse snatched bitten but it is some better at present.

We are having fine Sunday school at Macedonia every Sunday at 10 o'clock and singing at 3 o'clock. Everybody come out and join us and have a good time. Also preaching there twice a month, every first and third Sunday.

Clyde Davis and family visited Ashberry Davis and family Wednesday night and Thursday, May 5 and 6.

Mrs. Mandy Morlan shopped at Monett Tuesday.

We are told that Professor Calvin Henderson has the Marbut school.

CARE OF CHICKS TEN DAYS OLD

(By H. L. Kempster)

Now hatched chicks require special food and care especially during the first ten days.

After they are ten days old the following mixture should be kept in a trough where the chicks can run to it at all times:

30 parts corn meal, 30 parts wheat middlings, 10 parts pure beef scrap sifted fine and 1 part bone meal and finely cut green food.

As the chicks increase in size the mixed chick food can be replaced by coarser grains. At this stage it may be advisable to feed a wet mash once a day, about 4:00 p. m. The chicks should be given no more feed than they will eat up before going to roost. As they increase in size they should have access to dry mash in a hopper where they can help themselves.

Some essentials for successful brooding are, clean food consisting of both cracked grains and ground feed; animal food, such as milk, buttermilk or commercial beef scraps; extra bone making material, such as bone meal; clear water; plenty of shade; comfortable dry quarters; freedom from lice, and access to clean fresh earth.

White Pine Screen Doors are as cheap as inferior yellow pine doors; lighter, thicker and better.
